Global Methane Forum

28-30 March 2016

Georgetown University Hotel and Conference Center
Washington, DC, USA

Join your fellow methane experts and policy-makers from around the world to discuss options for methane reduction and abatement activities. Organized by the Global Methane Initiative (GMI) in partnership with the Climate and Clean Air Coalition (CCAC), the Forum will be held back-to-back with a two-day CCAC Working Group meeting, which will take place at the same venue on 31 March – 1 April.

This unique opportunity will grant access to:

- High-level plenary sessions on cross-cutting issues such as project financing.
- Technical sessions on biogas (agricultural sources, municipal solid waste, municipal wastewater systems), coal mines, and oil and natural gas systems.
- Joint GMI Subcommittee – CCAC Initiative level discussions on policy and projects.
- Opportunities for networking with methane experts in the public and private sectors from around the world.
