

Municipal Solid Waste Update

ARGENTINA

Marcelo Eduardo Rosso
GMI Municipal Solid Waste Subcommittee Meeting
Vancouver, Canada, 13 March 2013

Partner Country Update

- Regulatory Update –There has not been any changes in the present legislation in the last years.
- Implementation of national solid waste plans/directives. Currently, an updating of the national plan for the solid waste management is taking place (GIRSU)

Partner Country Update

- Project update. At present, 11 degasification plants are operating:
- 7 in the metropolitan area of the city of Buenos Aires NIII, NIIIA, NIIIB. NIIIC, GC, E and VD.
- 2 in Buenos Aires Province San Nicolas and Olavarria,
- 3 in the rest of the country (Mendoza, Santa Fe).
- Out of these 11 degasification plants just 2 generate electricity for its subsequent commercialization.

Partner Country Update

2 plants generate electricity for its subsequent commercialization.

NIIC Landfill

- Tons CO₂ Eq: 6,043,349
- Electric Power Generation: 11,796 MW

NIIA Landfill

- Tons CO₂ Eq: 5,632,316
- Electric Power Generation: 5 MW

Methane Action Plan

- Summary
- Activities to promote mitigation/abatement- There is a potential to develop new projects but economic resources are required.
