

Satellite Monitoring Campaign & OGDC

2022-2023 Results

Pietro Mezzano – Global Methane Forum – March 20, 2024

OUR MEMBER COMPANIES

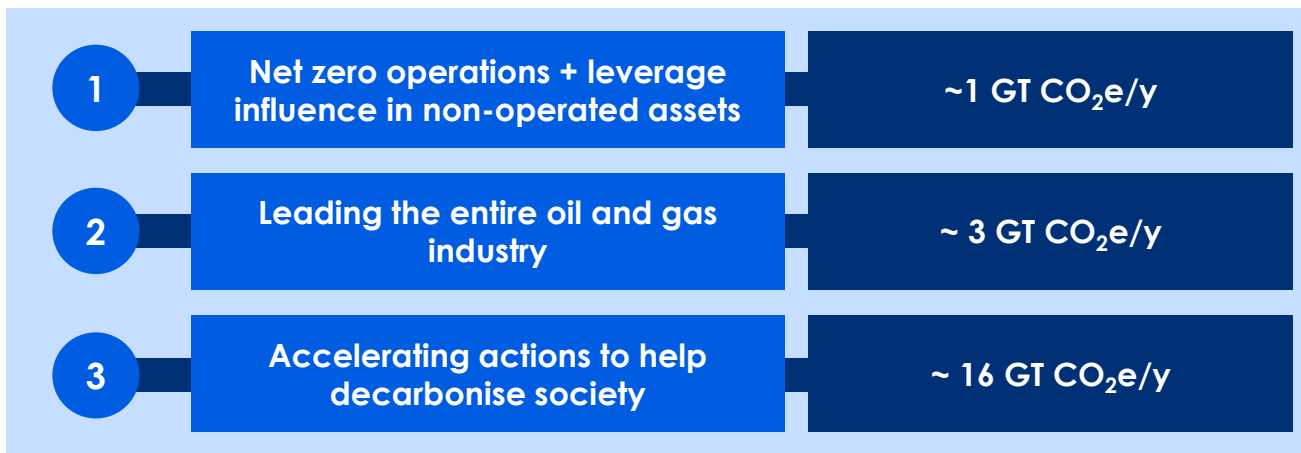

The Oil and Gas Climate Initiative

Our member companies

Our strategy to catalyse climate impact

Our focus areas

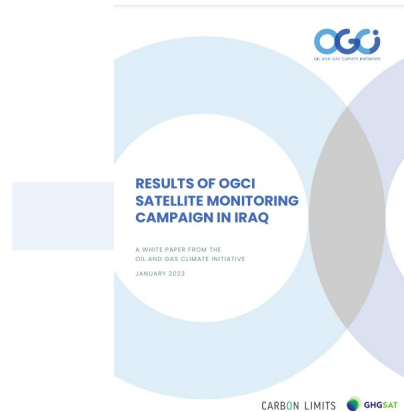

Source: OGCI Website (2023)

Objectives of the campaign

1. Help O&G companies mitigate methane emissions
2. Better understand satellite monitoring technologies / capacity building
3. Further characterise methane emissions in given regions and countries

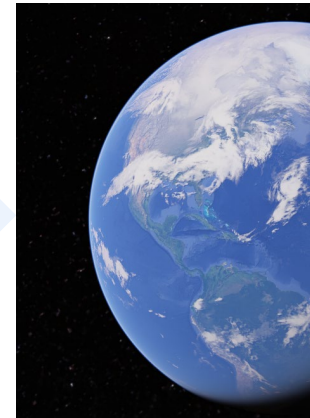

Our journey since 2021

2021-2022 – Pilot in Iraq

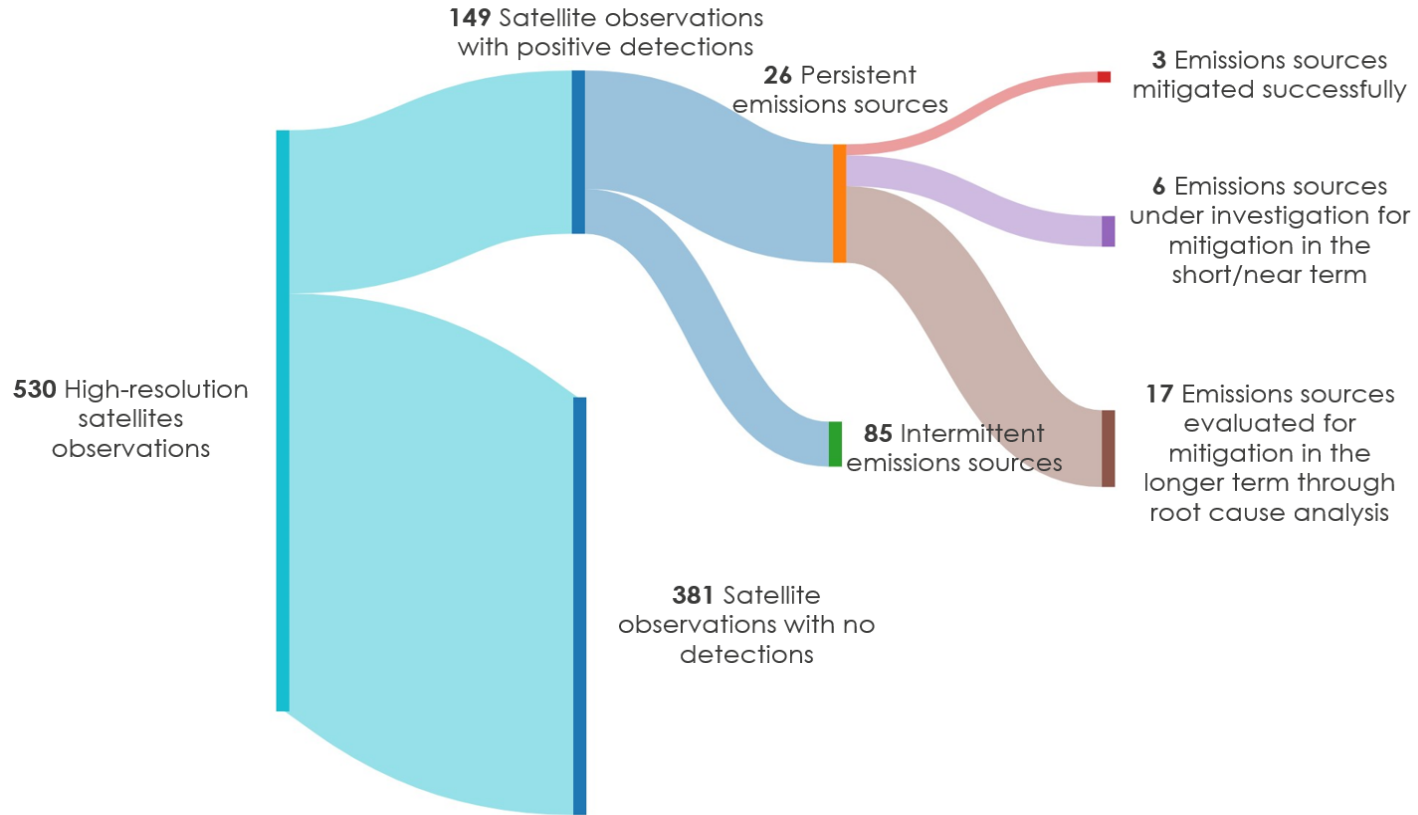

2022-2023 – Expansion to Algeria, Egypt and Kazakhstan

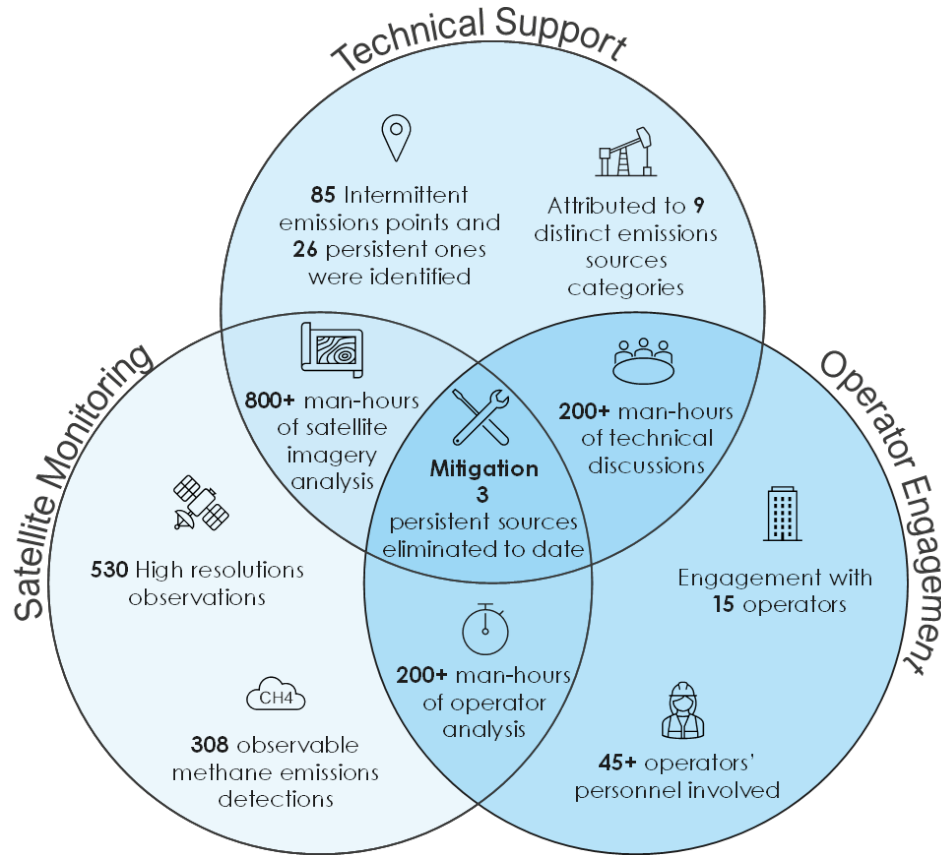

2023-2024 – Eight to ten countries in scope

Results from the 2022-2023 Campaign

Results from the 2022-2023 Campaign

Oil and Gas Decarbonisation Charter (OGDC) launched at COP28

Core pillars of the O&G Decarbonization Charter

Net Zero Scope 1 & 2 emissions by 2050

Near Zero Upstream Methane Emissions by 2030

Zero Routine Flaring by 2030

Company specific 2030 aspirations for Scope 1 & 2 emissions public by 2025

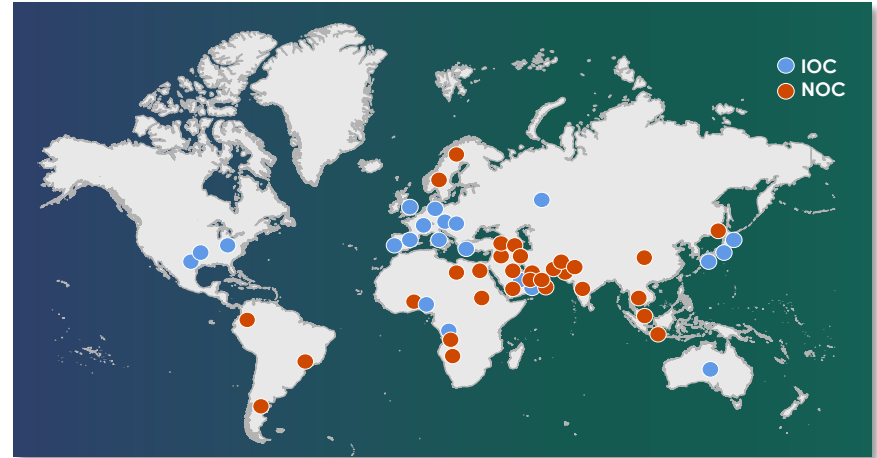

Cross-industry collaboration towards implementation of industry best practices

Internationally recognized framework to measure, monitor, report and verify progress

Commitment to invest in the energy system of the future

+50 Companies

+40% Global Oil Production

+30 Countries

All Continents
