

GHANA/TEMA OIL REFINERY (TOR) LIMITED

Mary Kwafo

CHALLENGES

- i. **Economic** (High cost of operations due to the use of fuel oil for firing boilers, leading to excessive flaring of fuel gas)
- ii. **Technical** (Operational interruptions and product losses due to leaks and spills)
- iii. **Legal** (Resource Efficiency and Cleaner Production)

ACTION

- i. Economic (Construction of Gas Letdown Station to enable the use of fuel gas for firing boilers)**
 - *Reduction in fuel oil consumptions and flaring*
- ii. Technical (Regular Checks and Maintenance)**
 - *Prevent leaks and spills from flanges, Valves, Pumps, Heat exchangers and storage tanks.*
- iii. Legal (Optimization of Operations for Greenhouse Gas (GHG) Emissions Reduction)**
 - *Project proposal pending approval*

Thank you
