United States – Daniel Hopper, Environmental Protection Agency

Updates on progress to reduce methane emissions from the oil & gas sector

GMI Oil & Gas Subcommittee members and Project Network members, that choose to do so, may briefly update the group on their national activities to advance methane emissions reductions.

Emissions Reductions Alberta – Mark Summers

Ecopetrol - Martha Herrera

Path forward for GMI Oil & Gas Subcommittee – collaboration

Opportunities for expanded international collaboration to reduce global methane emissions and reaffirm our mission and focus. As re-chartered in 2016, GMI has formally and strategically aligned its activities with the CCAC and the United Nations Economic Commission for Europe.

United States – Daniel Hopper, Environmental Protection Agency

Aligning the strategic plan of the GMI Oil & Gas Subcommittee with Partner Country and company needs.

Identifying the key needs of Partner Countries and companies to reduce methane emissions from oil and gas. The GMI Oil & Gas Subcommittee members will then discuss how to align the GMI Oil & Gas Subcommittee Action Plan with these needs (through 2021).

Wrap Up, Review Action Items, and Adjourn
